Dear \_\_\_\_\_,

Do you fly the US flag in front of your place of business? As the President of a US based company have you ever thought of displaying an indoor US flag set in the lobby of your business?

This is a great way to greet your visitors and say that you are proud to be a part of the American economy especially in these trying times. Matching state sets are also available so you can display state pride.

Make your international visitors feel welcome by displaying the flag of their country alongside our national flag. Indoor flags slip easily on and off the poles and can be rotated regularly.

These deluxe quality sets are US made by America's oldest and largest flagmaker, Annin & Co. If you would like more information please contact us.

Yours truly,

Your name & title
